

Access Guide – EMIS Web GP Practices and Hubs

The Care and Health Information Exchange (CHIE) is a computer system used by the NHS and Social Care to safely share important information about a patient with those treating them.

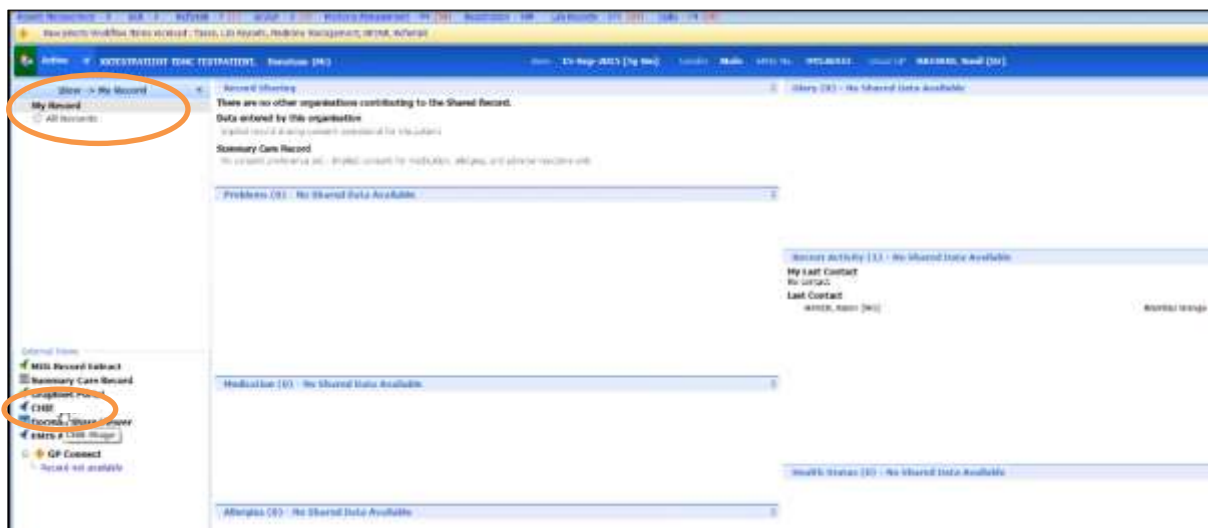

You can use CHIE to access GP records, Community, and hospital records (pathology reports, X-ray or scan reports, discharge summaries and clinic letters) for patients registered to GPs in Hampshire and the Isle of Wight.

Accessing CHIE via EMIS Web

- In EMIS Web, search and load a patient record as normal.

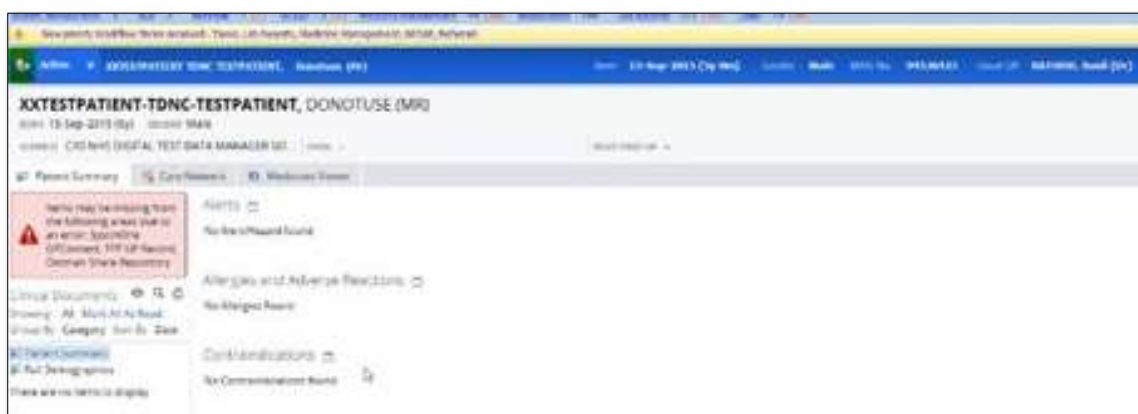

- From a screen in the care record (**Summary** in this example), expand the 'View My Record' section.

- Expand the Summary view to display the 'External Views' Windowlet.
- In the External Views windowlet, click on CHIE to launch the portal.
- Each user will be prompted to accept a disclaimer the first time that they carry out this process.

The Landing Page / Home Screen

- This is the first page that you will see, the content of which is determined by your job role (Role Based Access Level). An example of a typical Clinical Practitioner Landing Page:

Help and Assistance

- Download this and other user guides and webinars from our information sites:
